

**HydroStorm** HydroStorm is the newest hydrodynamic separator from Hydroworks. Designed to handle drops and multiple inlets, this separator is becoming the standard for new development everywhere.

**HydroGuard** HydroGuard was the first hydrodynamic separator from Hydroworks. There are over 3000 HydroGuard separators in operation. This proven separator works best for single inlet applications and trash/floatables removal during high flows.

**HydroDome** HydroDome is designed for smaller sites where a standard separator would be overkill. Need a separator for a small area at significant cost savings? Look no further than HydroDome.

**HydroFilter** Coming Soon! HydroFilter is a new filter designed to provide recharge (infiltration). Treat and infiltrate water similar to predevelopment hydrology with HydroFilter.
